DECLARATION

I hereby declare that all the above mentioned information is true to the best of my knowledge.

OBJECTIVE

To secure a challenging position in a reputable organization to expand my learning, knowledge and skills.

PROJECTS

SOLAR TRACKER USING NODE MCU

Instead of using photo-sensors, microcontroller-based technique and servo motor mechanism is preferred to tilt the solar panel to minimize the consumption of power by solar tracker and increase the power generation.

WIRELESS CHARGER FOR ELECTRIC VEHICLES

This project is about wireless battery charger circuit for static charging of electric vehicles. It consists of a wireless battery charger circuit with the power transmitting coil and receiving coil. It works using inductive resonance power transmission principle using electromagnetic waves.

ACHIEVEMENTS

Won 2nd price for project presentation on SOLAR TRACKER USING NODE MCU held at VELALAR COLLEGE OF ENGINEERING AND TECHNOLOGY, Thindal.

CO-CURRICULAR ACTIVITIES

- Participated in Mastery course on "PYTHON".
- Participated in Value Added course on "PCB DESIGN".
- Participated in Value Added course on "ANDROID APP DEVELOPMENT USING ANDROID STUDIO".
